

AMLAN KUMAR SENGUPTA, PhD, PE
Professor
Department of Civil Engineering
Indian Institute of Technology Madras
Chennai.

Amlan K. Sengupta is a Professor at the Department of Civil Engineering, Indian Institute of Technology Madras. He teaches under-graduate and post-graduate courses in reinforced and prestressed concrete, and bridge engineering. His research interests include analytical modelling of shear in reinforced concrete (RC) members, seismic evaluation and retrofitting of RC buildings, behaviour of precast concrete buildings, and structural assessment of RC bridges. He is a member of Indian Concrete Institute, Indian Roads Congress and American Concrete Institute. He is a member of the National Building Code Sectional Committee, CED 46, and Special Structures Sectional Committee, CED 38, Bureau of Indian Standards.

Amlan K. Sengupta was a member of the editorial committee and author of a chapter in the *Handbook on Precast Concrete for Buildings*, published by Indian Concrete Institute in 2018. He was the co-editor and author of several chapters in the *Handbook on Seismic Retrofit of Buildings*, supported by Central Public Works Department and Indian Buildings Congress, and published by Narosa Publishing House in 2008. He has authored research papers and is a reviewer for several national and international journals on structural concrete.
